$$y = \sum_{i=0}^{100} f(x_i)$$

$$y = \sum_{i=0}^{100} f(x_i)$$

$$y = \begin{matrix} j \\ i \end{matrix}$$

$$y = \left(\!\left(\begin{matrix} \end{matrix}\right)\!\right)$$

$$y = \left[\!\left[\begin{matrix} \end{matrix}\right]\!\right]$$

$$y = \sum_{i=0}^{100} f(x_i)$$

$$1 + \cfrac{}{1 + \cfrac{}{1 + \cfrac{}{1 + \cfrac{}{1 + \cfrac{}{1 + \cfrac{}{1 + x}}}}}}$$

$$a = \frac{\overline{f}(x^2)}{\begin{matrix} j \\ i \end{matrix} \begin{matrix} j \\ i \end{matrix} f_i(x_j^2)}$$

$$a = \frac{\overline{f}(x^2)}{\begin{matrix} j \\ i \end{matrix} \begin{matrix} j \\ i \end{matrix} f_i(x_j^2)}$$

$$y = \begin{matrix} \end{matrix} x$$

Inline math: $y = \begin{matrix} \end{matrix} x$.
